

2024 RISK PREVENTION STRATEGY

The Risk Focus Area is *Culture and Communication*

Culture and Communication are the two most crucial tenets for creating a culture of safety and a risk prevention strategy for healthcare facilities. Establishing appropriate practices throughout the organization is essential to ensure accountability and effectiveness across all departments.

We invite you to join us in our webinars, where we will discuss building a **Risk Prevention Culture** for your organization. Our Risk Consultants will cover regulatory practices and explore the current healthcare environment to help leaders strategically prepare for 2024.

Let's start the new year together by laying the foundation for an Inspired Quality (IQ) initiative to shift focus from reactive to preventive risk management.

Please forward these registration links to others in your organization so they may register individually for our webinars. We have also set up our webinars where you, as a facility representative, can register for the webinar and display the webinar to multiple participants in a classroom-type setting. If you choose this setting, we will send out webinar information before each webinar to provide instructions on documenting attendance so each participant will receive credit for the course. You can register multiple times to give your staff several opportunities to participate.

CE Credit will be offered for nurses [ABNP064 – exp. 06/01/2027]. CE credit is available **only** for those who attend the webinars as live events. If you have any questions about this process, feel free to email Risk Management at riskmanagement@inspirien.net or contact your Risk Consultant.
