

2022 RISK PREVENTION STRATEGY

Our Inspirien Risk team is excited about 2022 and has developed a comprehensive Risk Prevention Strategy that gives us a great opportunity to partner with each of our insureds to enhance your organizational risk strategy.

This strategy is built around **six risk focus areas** that impact all healthcare facilities, no matter your size or location. There is a designed time frame (every two months) to focus on each risk area and our strategy includes – education webinars, best practices and resources that impact this particular risk. These components will help you understand ‘how’ this risk impacts your organization and provide tools to develop **action initiatives** to address and decrease the risk for your team.

This bi-monthly Risk Focus Area is

DOCUMENTATION

We encourage you to forward this registration link to others in your organization and they may register individually for our webinars. We have also set up our webinar process where you, as a facility representative, can register for the webinar and ‘show the webinar’ to multiple participants in a classroom type setting. If you choose this setting, we will send out webinar information before each webinar to provide you with instructions on how to document attendance so each participant will receive credit for the course. You are welcome to register for multiple times to provide your staff with several opportunities to participate.

CE Credit will be offered for nurses [ABNP064 – exp. 07/01/2023].

CE credit is available **only** for those who attend the webinars as “live events”.

If you have any questions about this process, feel free to email Debbie Franklin at dfranklin@inspirien.net or contact your Risk Consultant.

RISK FOCUS AREA: DOCUMENTATION

One of the greatest byproducts of a strong culture is appropriate **‘documentation’**. Over time, the day-to-day tasks of data input can become tedious. Mistakes, vagueness, or irregularities can plague a patient record for a lifetime unless you can shift the narrative. The key to overcoming form-fatigue is a show, not tell method of demonstrating impact and explaining why it matters.

Join us as we discuss **‘best practices’** and share the **‘why’** behind both documentation pertinent to regulatory processes and a patient’s medical record. Understanding the **‘why’** is the first step to **empowering** clinicians to **build better processes and practices** related to **documentation**.

DATE	WEBINAR ID & Contact hours	REGISTRATION LINK
03/30/2020 10 AM & 2PM	Emergency Preparedness Practices 070B – 1.2	https://attendee.gotowebinar.com/rt/4141878315276492558
