

2023 RISK PREVENTION SERIES

The Inspirien Risk team is excited about 2023 as we continue our efforts in offering our customers the tools needed to build a comprehensive Risk Prevention Strategy. This year's series is built around **Six Risk Focus Areas** that impact all healthcare facilities, regardless of size or location. The goal is to focus on one of the six key focus areas for two months. Information will be offered in multiple mediums, including education webinars, emails with links to best practice and resource information, and in-person or phone consultations. These engagement opportunities are designed to educate on the risk impacts and offer practical tools for helping our customers create actionable plans to improve their exposure.

This bi-monthly Risk Focus Area is **DOCUMENTATION**

Appropriate documentation of patient assessments, clinical interventions, and the processes used to support these efforts are essential to capture. However, it can become a cumbersome task in the list of responsibilities on the plate of most healthcare professionals. Mistakes, vagueness, or even non-standard language (e.g., Twitter-type responses) can plague a patient record for a lifetime. Electronic documentation further clouds the picture as some tend to pick their favorite “drop-down” or common abbreviations which don't necessarily paint the full picture of the actions taken. Inspirien would like to take you on a journey to demonstrate why good documentation matters in a webinar on this topic.

Webinar sessions will include Basic Documentation Strategies and Documentation Strategies related to the Electronic Healthcare Record. Additionally, we've added a webinar on the Root Cause Analysis process to give a better understanding of the documentation elements associated with this process. We will also discuss documentation related to Emergency Preparedness in light of its relevance to current times.

DATE	WEBINAR ID & Contact hours	REGISTRATION LINK
March 29th @ 10 & 2	Emergency Preparedness & Response 070C – 1.2 CE	https://attendee.gotowebinar.com/rt/3088340575138251104
April 12th @ 10 & 2	RCA, RCA² and FMECA in Healthcare 020E – 1.8 CE	https://attendee.gotowebinar.com/rt/6530323242984457049
April 13th @ 10 & 2	Documentation Strategies I – Basic W020C – 1.2 CE	https://attendee.gotowebinar.com/rt/6447555306159563351
April 20th @ 10 & 2	Documentation Strategies II – Electronic W021C-1.2 CE	https://attendee.gotowebinar.com/rt/5806472956956941143

Please forward these registration links to others in your organization, and they may register individually for our webinars. We have also set up our webinar process where you, as a facility representative, can register for the webinar and show the webinar to multiple participants in a classroom-type setting. If you choose this setting, we will send out webinar information before each webinar to provide instructions on documenting attendance so each participant will receive credit for the course. You can register multiple times to give your staff several opportunities to participate.

CE Credit will be offered for nurses [ABNP064 – exp. 07/01/2023]

CE credit is available only for those who attend the webinars as “live events.” If you have any questions about this process, please contact Debbie Franklin at dfranklin@inspirien.net or your dedicated Risk Consultant.
